PROFILE

Network & Telecom State Engineer (ENSA Safi, 2026) specialized in DevOps, Cloud and SRE. I automate infrastructure (Terraform, Ansible), run containerized platforms (Docker, Kubernetes), and build end-to-end observability and CI/CD pipelines.

EXPERIENCE

CIRES Technologies (Digital Factory), Tanger Med

DevOps & SRE Engineer — Final-Year Internship (PFE) Feb–Jun 2026
AI-Powered Observability Platform with LLM Root-Cause Analysis

✂ Terraform, Ansible, Kubernetes (k3s), Docker, Python (FastAPI), Prometheus, Loki, Jaeger, Grafana, OpenTelemetry, Ollama (LLM), Drain3, AWS

- Designed and shipped to production (June 2026) a unified observability platform (metrics, logs, traces) with an LLM-driven root-cause analysis (RCA) engine.
- Owned all infrastructure automation: Terraform (AWS) + Ansible (16 roles), distributed tracing via OpenTelemetry/Jaeger, and MCP bridge servers feeding live telemetry to the LLM.
- Cut median diagnosis latency from ~5 min to 38 s (AWS GPU + qwen2.5); 0.81/1 RCA quality, 100% detection recall on injected faults, 900+ automated tests.

Soft Key Success, Rabat

DevOps Engineer Mar–Jul 2025
Automated the deployment pipeline of the Snotifier mobile app (Android)

✂ AWS (CodePipeline, CodeBuild, S3, IAM, Secrets Manager), Fastlane, Terraform

- Built a full CI/CD pipeline for Android app delivery (AWS + Fastlane), secured credentials with Secrets Manager, automated rollback via S3, and defined scalable infrastructure as code with Terraform.

Soft Key Success, Rabat

Cloud & DevOps (Internship) Jul–Aug 2024

- Hands-on with AWS serverless services (Lambda, SQS, SNS) and cloud automation workflows; supported containerization and deployment pipelines.

PROJECTS

Azure GitOps CI/CD

December 2025

✂ AKS, ArgoCD, Azure DevOps, Helm, Docker

- Deployed a microservices architecture (Angular/Spring Boot/MySQL) on AKS with Azure DevOps CI/CD and ArgoCD GitOps sync (Helm packaging, ACR registry) — 95% success, 5 min/deployment.

SD-WAN / SASE FortiGate + AWS

October 2025

✂ FortiGate, AWS (VPC, EC2, Transit Gateway), IPsec VPN

- Hub-and-spoke architecture with FortiGate (secure hub, IPsec tunnels) and multi-layer security services (IPS, web filtering, sandboxing).

SKILLS

Cloud & DevOps	AWS (EC2, VPC, S3, RDS, IAM, Lambda, CodePipeline/Build, CloudWatch), Azure (AKS), Docker, Kubernetes (k3s), Terraform, Ansible, ArgoCD, Helm, CI/CD
Observability & SRE	Prometheus, Grafana, Loki, Jaeger, OpenTelemetry, Drain3, alerting, RCA
Languages	Python (FastAPI), Bash, SQL, Java, HTML
Systems & Networking	Linux, Nginx, SSH, TCP/IP, VPN/IPsec, FortiGate, DNS/DHCP, Git/GitHub

EDUCATION

ENSA Safi (National School of Applied Sciences)

State Engineer's Degree, Networks & Telecommunications 2021–2026

CERTIFICATIONS & LANGUAGES

Certifications: Google IT Support (Coursera, completed) · AWS Cloud Practitioner (in progress) · IBM DevOps & Software Engineering (in progress) · Agile Project Management (Google, in progress)

Languages: Arabic (native) · French (fluent) · English (fluent, C2 — EF SET) · Spanish (A1) · Mandarin (A1)
